AUTHORIZATION FOR SURGERY

I hereby authorize performance of surgery on the following pet _____.

The nature of the aforementioned surgery has been described to me to my satisfaction and I understand that no guarantee or warranty can ethically or professionally be made regarding the results or curative abilities of such surgery. I understand that all anesthetic and surgical procedures have a certain amount of risk that varies based on each pet's potential effect of surgery/anesthesia. In the event that complications arise and I cannot be reached immediately at the number below, CAH and its veterinarians are to make decisions they deem to be in the best interest of my pet(s). I agree to pay for all services rendered.

Signed: _____
Owner or agent of owner

Date: _____

Print Name: _____

Phone #: _____

THE FOLLOWING ADDITIONAL PROCEDURES ARE AVAILABLE:

PRE-SURGICAL BLOOD TESTING:

Includes a blood chemistry evaluation that checks liver and kidney values, blood glucose, and protein levels and a complete blood count.

REQUEST: REJECT:

ADVANCED PRE-SURGICAL BLOOD TESTING:

Includes the above blood chemistry evaluation as well as a complete blood count and clotting panel.

REQUEST: REJECT:

ADVANCED MONITORING:

SurgiVet multi-parameter monitoring system tracks: blood pressure, ECG with heart rate, end tidal CO₂, temperature, and specific pulse oximetry during your pets surgery to optimal anesthesia and patient monitoring.

REQUEST: REJECT:

HISTOPATHOLOGY: – (on Doctor recommendation)

Tumors/growths will be sent to laboratory for comprehensive testing.

REQUEST: REJECT:

RADIOWAVE SURGERY:

Radiowave surgery is an advanced technological instrument that can be used for any surgical procedure. Your pet will have a shorter time under anesthesia, quicker healing time, and lower risk of infection. It also decreases bleedings and pain after surgery.

REQUEST: REJECT:

MISCELLANEOUS:

- NAIL TRIM
- EAR CLEANING
- ANAL GLAND EXPRESSION
- DENTAL CLEANING
- BRUSH OUT/CLIP MATTS
- APPLY FLEA PREVENTION

VACCINATIONS:

Although we *require* only a current rabies vaccination in order for your pet to have surgery here, we *strongly recommend* keeping your pet current on other routine vaccinations as well. Dogs should be vaccinated for Distemper-Parvo, Rabies, Kennel Cough, and Canine Influenza (H3N2). Cats should be vaccinated for Feline Distemper, Feline Leukemia, and Rabies. Additional vaccines may be recommended based on your pet’s lifestyle and exposure risks. We prefer that vaccines be current *before* any surgery, but they may be preformed at the same time as most surgical procedures.

Please check the vaccines that you would like to have, and whether you request a full exam or technician administer vaccines:

Dogs:

- Distemper-Parvo
- Kennel Cough
- Canine Influenza
- Rabies

Cats:

- Feline Distemper
- Feline Leukemia
- Rabies

Please check one:

- EXAM
- OR-
- TECH FEE

INTESTINAL PARASITE CHECK:

Evaluates for parasites that may affect your pet’s ability to heal after surgery.

REQUEST: REJECT:

CANINE ONLY – HEARTWORM/TICK BORNE DISEASE PANEL:

Blood test for heartworms and exposure to tick-borne diseases.

REQUEST: REJECT:

FELINE ONLY - FELV/FIV/HEARTWORM TEST:

Blood test for systemic potentially fatal disease (feline leukemia and feline immunodeficiency virus) that may otherwise go undetected. REQUEST: REJECT:

MICROCHIPPING:

This provides a permanent form of identification for your pet; the microchip number will be registered in a national database that will allow you to find your pet should it become lost. Most animal shelters, humane societies, and vet clinics will be able to read the chip, which will be attached to your personal information. REQUEST: REJECT:

***PLEASE NOTE THAT IF FLEAS or FLEA DIRT ARE PRESENT WE WILL TREAT YOUR PET FOR FLEAS TO AVOID HOSPITAL INFESTATION AND IMPROVE YOUR PETS ABILITY TO HEAL.**
